MY PROJECTS:

Code Trace
Bug Tracking Web App

- Organize your company's workflow by using Code Trace, A project-oriented web application designed with simple ticket creation in mind. Assign your developers to tickets and track their development as they complete tasks.
- Built using C#, ASP.NET, PostgresSQL, HTML, CSS, and JS.

Byte Zone
Blogging Site

- Stay up to date with the latest technology with Byte Zone. A blogging site built with one author in mind. Register for an account and leave comments or easily view the content anonymously. With a built-in sorting system
- Built using C#, ASP.NET, PostgresSQL, HTML, CSS, and JS.

Relay Connect
Address Book/Contact Managing Web App

- Easily add and search your contacts with Relay Connect. A contact application capable of not only storing information but also sending emails to individuals or groups with ease
- Built using C#, ASP.NET, PostgresSQL, HTML, CSS, and JS.

Demo personal projects on my website. ⬈
