Professional Summary

Highly accomplished Backend Software Engineer with over 4 years of experience, specializing in .NET Core and Go to deliver high-performance, scalable web applications and API solutions. Adept at driving technical projects, optimizing system performance, and enhancing security. Proven leader in mentoring teams, adopting design patterns, and ensuring adherence to best coding practices. Expert in secure coding with a track record of significantly improving system stability and development efficiency. Passionate about solving complex problems with cutting-edge technologies and delivering business-critical solutions.

Key Skills & Technologies

- **Programming Languages:** C#, Go, Java, JavaScript, HTML, CSS
- **Frameworks & Libraries: .**NET Core, .NET Framework, Entity Framework Core, MVC
- **Databases:** PostgreSQL, MS SQL, MySQL, SQL Server, MongoDB
- **Development Practices:** Agile (Kanban), Test-Driven Development (TDD), Secure Coding, Design Patterns
- **Tools & Technologies:** Git, Docker, Kubernetes, Postman, RabbitMQ, AWS, GCP, CI/CD
- **Soft Skills:** Leadership, Cross-functional Collaboration, Effective Communication, Agile Coaching

---

Professional Experience

Senior Backend Developer | Renda Limited
July 2023 – Present
Empowering next-generation logistics with robust backend solutions built using .NET Core and Go.

- **Architected** and **developed** the backend for **Renda 2.0**, creating scalable and high-performance systems that boosted operational efficiency.
- Integrated Go microservices to handle **high-throughput processing**, reducing latency by 30%.
- **Led the adoption** of **secure coding practices**, ensuring compliance with **OWASP standards** and minimizing vulnerabilities.
- Streamlined backend development processes, **increasing productivity by 20%** through optimized workflows and advanced design patterns.
- **Mentored** junior developers, elevating overall team performance and code quality.

Senior Backend Developer | Revent Technologies
May 2022 – July 2023
Delivered seamless API integrations and robust system architecture for global clients.
- Spearheaded backend development for critical projects including API integrations with major platforms like Gusto and Intercom.
- Improved system performance by 25% through optimized caching strategies and effective use of distributed systems.
- Championed OWASP-compliant security standards, enhancing system integrity and protecting user data.
- Led a team of developers in a fast-paced Agile environment, fostering a culture of continuous improvement.

.NET Developer & E-Products Champion | Unity Bank Plc
June 2020 – May 2022
Engineered banking solutions that streamlined operations and ensured data accuracy.
- Developed a Credit Card Processing System, reducing manual processing time by 40%.
- Delivered a Procurement Portal, improving procurement accuracy and reducing operational delays by 35%.
- Refactored legacy codebases, leading to a 40% reduction in system bugs and issues.

Java Developer | MEMMCOL
June 2019 – December 2019
- Enhanced and developed web-based systems using Java, HTML, CSS, and JavaScript, improving operational efficiency across multiple departments.

Projects & Achievements

Renda Limited
- [**Renda 2.0**](#): Designed a scalable backend architecture that increased system throughput and reduced downtime by 25%.
- [Go Microservices](#): Implemented microservices for real-time logistics tracking, significantly reducing response times for critical operations.

Revent Technologies
- [VybeCash](#): Developed a secure financial services app, improving user management and transaction processing.
- [Flowmono](#): Led the development of an e-signature and workflow management tool, streamlining document handling and team collaboration.

Unity Bank
- Credit Card Portal: Engineered a secure credit card management portal, reducing fraud incidents by 20%.
- Bulk Account Opening System: Created a system that maintained data integrity, preventing duplicate account creation.

Education & Certifications
- **BSc. Statistics | University of Ilorin**
- [EF Standard English Test](#)
- [OWASP Top 10, C# Secure Coding Fundamentals](#)

Additional Information

- **Remote Work Compatibility: Available for remote work across UTC - UTC+8 time zones.**
- **Message Broker Expertise: Experienced in designing scalable solutions with RabbitMQ for efficient messaging queues.**
- **Leadership: Strong background in mentoring teams, fostering a collaborative environment, and driving results through Agile practices.**

Why Hire Me?

I bring a unique blend of technical expertise, security focus, and leadership abilities, enabling me to deliver robust backend solutions that scale with your business needs. My deep experience in .NET Core, Go, and secure coding practices ensures high-quality code that drives business outcomes. I thrive in dynamic environments and am dedicated to continuously improving systems and mentoring teams to achieve excellence.
